RESPONSE UNDER 37 C.F.R. § 1.111

Sir:

This is in response to the Office Action dated April 11, 2000, in response to the Appeal Brief filed January 28, 2000. A petition for an extension of time is being filed simultaneously herewith.

Kindly amend the application as follows:

IN THE ABSTRACT

Please delete the abstract on file and substitute therefor:

C  
A late transition metal catalyst system for polymerization of olefin monomers is a Group 9, 10 or 11 metal complex stabilized by a bidentate ligand immobilized on a solid support where the late transition metal loading is less than 100 micromoles transition metal compound per gram of solid support. The bidentate ligand has the formula:
